Synthetic Metals 67 (1994) 325–329

SYNTHETIC METALS

Subject Index of Volume 67

N-Allylpyrrole
N-allylpyrrole as a bifunctional precursor to electrically conducting and filmable organic polymers: synthesis and preliminary characterization, 235
Aluminium
a joint theoretical and experimental study of the aluminium/polyethylene terephthalate interface, 97
a density-functional theory study of the aluminum/polythiophene interface, 147
Applications
energy formulation for electronic, optical and acoustical applications including interfacial properties and irreversible processes, 287
Arylene ethynylene
electronic structure of π-conjugated arylene ethynylene polymers, 315

Band structure
electronic band structure of conjugated polymers, 15

Calcium
interface formation between poly(2,5-diheptyl-*p*-phenylenevinylene) and calcium: implications for light-emitting diodes, 133
Calixarene
dielectric properties of calixarene thin films in a large frequency range, 231
Carbon black
I–V characteristics of the carbon black-filled polyethylene interface with tin electrodes, 129
Carrier injection
carrier injection into semiconducting polymers: Fowler–Nordheim field-emission tunneling, 23
Charge carrier injection
study of charge carrier injection and luminescence processes in oligothiophene-based light-emitting diodes, 173
Charge transport
charge transport in organic light-emitting diodes: polarons or holes, 177
Composites
multi-component polymeric composites, 255
Conductivity
a.c. conductivity of thermally dedoped polyaniline, 207
N-allylpyrrole as a bifunctional precursor to electrically conducting and filmable organic polymers: synthesis and preliminary characterization, 235
changes of conductivity and electrochemical properties of polypyrrole by ion implantation, 273
Conjugated molecules and polymers
the evolution of charge-induced gap states in degenerate and non-degenerate conjugated molecules and polymers as studied by photoelectron spectroscopy, 81
Conjugated polymers
light-emitting diodes fabricated with conjugated polymers – recent progress, 3
electronic and chemical structure of conjugated polymers and their interfaces: experiment, theory and a glance toward the future, 11
electronic band structure of conjugated polymers, 15
electronic structure of π-conjugated arylene ethynylene polymers, 315
Copolymer
synthesis of a polyphenylene light-emitting copolymer, 161
Crown ethers
designing polypyrrole-based sensors: selective electrochemical cation in aza crown ethers, 251
Current–voltage characteristics
I–V characteristics of the carbon black-filled polyethylene interface with tin electrodes, 129

Density-functional theory
a density-functional theory study of the aluminum/polythiophene interface, 147
Deposition
chemical vapour deposition of poly(1,4-phenylenevinylene) films, 71
Dielectric properties
dielectric properties of calixarene thin films in a large frequency range, 231
Diodes
light-emitting diodes fabricated with conjugated polymers – recent progress, 3
interface formation between poly(2,5-diheptyl-*p*-phenylenevinylene) and calcium: implications for light-emitting diodes, 133
characterization of properties of polymeric light-emitting diodes over extended periods, 157
transient electroluminescence in poly(*p*-phenylenevinylene) light-emitting diodes, 165
dynamics of photoexcitations in electric fields in poly(*p*-phenylenevinylene) diodes, 169
study of charge carrier injection and luminescence processes in oligothiophene-based light-emitting diodes, 173
charge transport in organic light-emitting diodes: polarons or holes, 177
transient electroluminescence of monolayer and bilayer sexithiophene diodes, 197
Doping
optical absorption studies of sodium doped poly(cyanoterephthalylidene), 93
a.c. conductivity of thermally dedoped polyaniline, 207
an investigation of doped polypyrrole by a combination of scanning tunnelling and atomic force microscopes, 211
spectroscopic and electrical investigations of undoped and doped α-oligothiophene thin films, 267

Elsevier Science S.A.

Doping potentials
new substituted polybenzo[*c*]thiophenes: controlling the n- and p-doping potentials, 241
Dynamics
dynamics of photoexcitations in electric fields in poly(*p*-phenylenevinylene) diodes, 169

Electrical investigation
spectroscopic and electrical investigations of undoped and doped α-oligothiophene thin films, 267
Electrochemical investigations
electrochemical and photoelectrochemical investigations of polybithiophene films, 263
Electrochemical properties
changes of conductivity and electrochemical properties of polypyrrole by ion implantation, 273
Electrochemistry
in situ electrochemical ESR investigations of the growth of one- and two-dimensional polypyrrole films, 227
Electrodes
electrode-limited photoinjection at metal/polymer interface, 103
interface properties of silver electrodes on two-dimensional polypyrrole films, 109
I–V characteristics of the carbon black-filled polyethylene interface with tin electrodes, 129
Electroluminescence
synthesis of a polyphenylene light-emitting copolymer, 161
transient electroluminescence in poly(*p*-phenylenevinylene) light-emitting diodes, 165
electroluminescence and photoluminescence investigations of the yellow emission of devices based on ladder-type oligo(*para*-phenylene)s, 181
transient electroluminescence of monolayer and bilayer sexithiophene diodes, 197
Electronic processes
electronic processes at interfaces involving conducting polymers, 137
Electronic properties
electrochemical and photoelectrochemical investigations of polybithiophene films, 263
Electronic structure
electronic band structure of conjugated polymers, 15
electronic structure of π-conjugated arylene ethynylene polymers, 315
Electron spin resonance
in situ electrochemical ESR investigations of the growth of one- and two-dimensional polypyrrole films, 227
Electro-optical intensity modulator
optical and electrical assessment of an electro-optical intensity modulator from the conjugated polymer poly(2,5-dimethoxy-*p*-phenylenevinylene), 299
Energy formulation
energy formulation for electronic, optical and acoustical applications including interfacial properties and irreversible processes, 287

Field-effect devices
the charged excitations in thin films of α-sexithiophene within semi-transparent field-effect devices: investigation by optical spectroscopy of field-induced charge and by photoimpedance spectroscopy, 215
Films
preparation and properties of highly oriented polytetrafluoroethylene films, 55
chemical vapour deposition of poly(1,4-phenylenevinylene) films, 71
highly ordered ultra-thin α5-thiophene films on SiO_2 and $Si(100)+O(N_2O)$, 87
interface properties of silver electrodes on two-dimensional polypyrrole films, 109
well-organized phthalocyanine Langmuir–Blodgett films incorporated into symmetrical (metal/thin organic film/metal) sandwich structures, 193
the charged excitations in thin films of α-sexithiophene within semi-transparent field-effect devices: investigation by optical spectroscopy of field-induced charge and by photoimpedance spectroscopy, 215
in situ electrochemical ESR investigations of the growth of one- and two-dimensional polypyrrole films, 227
dielectric properties of calixarene thin films in a large frequency range, 231
N-allylpyrrole as a bifunctional precursor to electrically conducting and filmable organic polymers: synthesis and preliminary characterization, 235
electrochemical and photoelectrochemical investigations of polybithiophene films, 263
spectroscopic and electrical investigations of undoped and doped α-oligothiophene thin films, 267
structural control of the optical properties of thin films of oligothiophenes, 277

Gap states
the evolution of charge-induced gap states in degenerate and non-degenerate conjugated molecules and polymers as studied by photoelectron spectroscopy, 81
Graphite
scanning tunnelling microscopy of alkylated oligothiophenes at interfaces with graphite, 47
theoretical modeling of the geometric and electronic structure of polymer/graphite interfaces, 151

Heterostructures
organized metal/organic film/metal heterostructures: a way towards molecular electronic devices?, 281
Hyper-scattering
characterization of nonlinear optical properties by hyper-scattering techniques, 31

Interfaces
electronic and chemical structure of conjugated polymers and their interfaces: experiment, theory and a glance toward the future, 11
is there an interaction at the aromatic site(s) in a metal/polymer interface? An XPS and HREELS review, 39
scanning tunnelling microscopy of alkylated oligothiophenes at interfaces with graphite, 47
surface, transforms and interfaces; the SMART direction for polymer science, 63
a joint theoretical and experimental study of the aluminium/polyethylene terephthalate interface, 97
electrode-limited photoinjection at metal/polymer interface, 103
interface properties of silver electrodes on two-dimensional polypyrrole films, 109
internal photoemission studies of metal/polymer interfaces, 115
XPS analysis of Cu/Teflon interface irradiated by heavy ions, 121
interface formation between poly(2,5-diheptyl-*p*-phenylenevinylene) and calcium: implications for light-emitting diodes, 133

electronic processes at interfaces involving conducting polymers, 137
a density-functional theory study of the aluminum/polythiophene interface, 147
theoretical modeling of the geometric and electronic structure of polymer/graphite interfaces, 151
inter-layer mixing effect on the transport properties of a dual-layer organic photoreceptor interface, 201
Interfacial properties
energy formulation for electronic, optical and acoustical applications including interfacial properties and irreversible processes, 287
Ion implantation
changes of conductivity and electrochemical properties of polypyrrole by ion implantation, 273
Irradiation
XPS analysis of Cu/Teflon interface irradiated by heavy ions, 121

LB film
organized metal/organic film/metal heterostructures: a way towards molecular electronic devices?, 281
LED
characterization of properties of polymeric light-emitting diodes over extended periods, 157
Lifetime
characterization of properties of polymeric light-emitting diodes over extended periods, 157
Luminescence
study of charge carrier injection and luminescence processes in oligothiophene-based light-emitting diodes, 173
Luminescent structures
luminescent structures of porous silicon capped by conductive polymers, 111

Microcrystalline structure
photoluminescence under selective excitation of thiophene oligomers: relationship to microcrystalline structure, 223
Microscopes
an investigation of doped polypyrrole by a combination of scanning tunnelling and atomic force microscopes, 211
Microscopy
scanning tunnelling microscopy of alkylated oligothiophenes at interfaces with graphite, 47
Modeling
theoretical modeling of the geometric and electronic structure of polymer/graphite interfaces, 151
Modulators
polymeric optochips: splitters, switches and modulators, 77
Molecular electronic devices
organized metal/organic film/metal heterostructures: a way towards molecular electronic devices?, 281

Nonlinear optical properties
characterization of nonlinear optical properties by hyper-scattering techniques, 31

Oligomers
theoretical study of the interaction between sodium and oligomers of poly(*p*-phenylenevinylene) and poly(*p*-phenylene), 141
Oligo(*para*-phenylene)
electroluminescence and photoluminescence investigations of the yellow emission of devices based on ladder-type oligo(*para*-phenylene)s, 181
Oligothiophenes
scanning tunnelling microscopy of alkylated oligothiophenes at interfaces with graphite, 47
study of charge carrier injection and luminescence processes in oligothiophene-based light-emitting diodes, 173
spectroscopic and electrical investigations of undoped and doped α-oligothiophene thin films, 267
structural control of the optical properties of thin films of oligothiophenes, 277
Optical absorption
optical absorption studies of sodium doped poly(cyanoterephthalylidene), 93
Optical properties
structural control of the optical properties of thin films of oligothiophenes, 277

Photoemission
internal photoemission studies of metal/polymer interfaces, 115
Photoexcitations
dynamics of photoexcitations in electric fields in poly(*p*-phenylenevinylene) diodes, 169
Photoinjection
electrode-limited photoinjection at metal/polymer interface, 103
Photoluminescence
electroluminescence and photoluminescence investigations of the yellow emission of devices based on ladder-type oligo(*para*-phenylene)s, 181
photoluminescence under selective excitation of thiophene oligomers: relationship to microcrystalline structure, 223
Photoreceptor
inter-layer mixing effect on the transport properties of a dual-layer organic photoreceptor interface, 201
Photovoltaic effect
the photovoltaic effect in a platinum poly-yne, 245
Phthalocyanine
well-organized phthalocyanine Langmuir–Blodgett films incorporated into symmetrical (metal/thin organic film/metal) sandwich structures, 193
Platinum
the photovoltaic effect in a platinum poly-yne, 245
Poly(1,4-phenylenevinylene)
chemical vapour deposition of poly(1,4-phenylenevinylene) films, 71
Poly(2,5-diheptyl-*p*-phenylenevinylene)
interface formation between poly(2,5-diheptyl-*p*-phenylenevinylene) and calcium: implications for light-emitting diodes, 133
Poly(2,5-dimethoxy-*p*-phenylenevinylene)
optical and electrical assessment of an electro-optical intensity modulator from the conjugated polymer poly(2,5-dimethoxy-*p*-phenylenevinylene), 299
Poly(3,3′-phthalidylidene-4,4′-biphenylene)
some chemical and electronic structures of the non-conjugated polymer poly(3,3′-phthalidylidene-4,4′-biphenylene), 125
a theoretical study of the chemical structure of the non-conjugated polymer poly(3,3′-phthalidylidene-4,4′-biphenylene) 319
Poly(3-decylthiophene)
poly(3-decylthiophene) as $\chi^{(3)}$ active material in waveguides, 293
Polyaniline
a.c. conductivity of thermally dedoped polyaniline, 207
Polybenzo[*c*]thiophenes
new substituted polybenzo[*c*]thiophenes: controlling the n- and p-doping potentials, 241
Polybithiophene
electrochemical and photoelectrochemical investigations of polybithiophene films, 263

Poly(cyanoterephthalylidene)
optical absorption studies of sodium doped poly(cyanoterephthalylidene), 93
Polydiacetylene
electronic structure of 4-BCMU polydiacetylene studied by angle-dependent photoelectron spectroscopy, 309
Polyethylene
I–V characteristics of the carbon black-filled polyethylene interface with tin electrodes, 129
Polyethylene terephthalate
a joint theoretical and experimental study of the aluminium/polyethylene terephthalate interface, 97
Polymeric optochips
polymeric optochips: splitters, switches and modulators, 77
Polyphenylene
synthesis of a polyphenylene light-emitting copolymer, 161
Poly(*p*-phenylene)
theoretical study of the interaction between sodium and oligomers of poly(*p*-phenylenevinylene) and poly(*p*-phenylene), 141
Poly(*p*-phenylenevinylene)
theoretical study of the interaction between sodium and oligomers of poly(*p*-phenylenevinylene) and poly(*p*-phenylene), 141
characterization of properties of polymeric light-emitting diodes over extended periods, 157
transient electroluminescence in poly(*p*-phenylenevinylene) light-emitting diodes, 165
dynamics of photoexcitations in electric fields in poly(*p*-phenylenevinylene) diodes, 169
Polypyrrole
interface properties of silver electrodes on two-dimensional polypyrrole films, 109
an investigation of doped polypyrrole by a combination of scanning tunnelling and atomic force microscopes, 211
in situ electrochemical ESR investigations of the growth of one- and two-dimensional polypyrrole films, 227
designing polypyrrole-based sensors: selective electrochemical cation in aza crown ethers, 251
changes of conductivity and electrochemical properties of polypyrrole by ion implantation, 273
Polytetrafluoroethylene
preparation and properties of highly oriented polytetrafluoroethylene films, 55
XPS analysis of Cu/Teflon interface irradiated by heavy ions, 121
Polythiophene
a density-functional theory study of the aluminum/polythiophene interface, 147
Poly-yne
the photovoltaic effect in a platinum poly-yne, 245

Quadratic molecular media
cascading of second-order processes in quadratic molecular media at the origin of very large cubic effects, 303

Second-order processes
cascading of second-order processes in quadratic molecular media at the origin of very large cubic effects, 303
Semiconducting polymers
carrier injection into semiconducting polymers: Fowler–Nordheim field-emission tunneling, 23
Sensors
designing polypyrrole-based sensors: selective electrochemical cation in aza crown ethers, 251
Sexithiophene
transient electroluminescence of monolayer and bilayer sexithiophene diodes, 197
the charged excitations in thin films of α-sexithiophene within semi-transparent field-effect devices: investigation by optical spectroscopy of field-induced charge and by photoimpedance spectroscopy, 215
Silicon
highly ordered ultra-thin α5-thiophene films on SiO_2 and $Si(100)+O(N_2O)$, 87
luminescent structures of porous silicon capped by conductive polymers, 111
Silver
interface properties of silver electrodes on two-dimensional polypyrrole films, 109
SMART direction
surface, transforms and interfaces; the SMART direction for polymer science, 63
Sodium
theoretical study of the interaction between sodium and oligomers of poly(*p*-phenylenevinylene) and poly(*p*-phenylene), 141
Space charge
space charge limited injection into trap-free polymers, 187
Spectroscopy
is there an interaction at the aromatic site(s) in a metal/polymer interface? An XPS and HREELS review, 39
the evolution of charge-induced gap states in degenerate and non-degenerate conjugated molecules and polymers as studied by photoelectron spectroscopy, 81
XPS analysis of Cu/Teflon interface irradiated by heavy ions, 121
the charged excitations in thin films of α-sexithiophene within semi-transparent field-effect devices: investigation by optical spectroscopy of field-induced charge and by photoimpedance spectroscopy, 215
spectroscopic and electrical investigations of undoped and doped α-oligothiophene thin films, 267
electronic structure of 4-BCMU polydiacetylene studied by angle-dependent photoelectron spectroscopy, 309
Splitters
polymeric optochips: splitters, switches and modulators, 77
Structure
electronic and chemical structure of conjugated polymers and their interfaces: experiment, theory and a glance toward the future, 11
luminescent structures of porous silicon capped by conductive polymers, 111
some chemical and electronic structures of the non-conjugated polymer poly(3,3′-phthalidylidene-4,4′-biphenylene), 125
theoretical modeling of the geometric and electronic structure of polymer/graphite interfaces, 151
structural control of the optical properties of thin films of oligothiophenes, 277
electronic structure of 4-BCMU polydiacetylene studied by angle-dependent photoelectron spectroscopy, 309
a theoretical study of the chemical structure of the non-conjugated polymer poly(3,3′-phthalidylidene-4,4′-biphenylene), 319
Surface
surface, transforms and interfaces; the SMART direction for polymer science, 63
Switches
polymeric optochips: splitters, switches and modulators, 77
Synthesis
synthesis of a polyphenylene light-emitting copolymer, 161
N-allylpyrrole as a bifunctional precursor to electrically conducting and filmable organic polymers: synthesis and preliminary characterization, 235

Thickness dependence
electrochemical and photoelectrochemical investigations of polybithiophene films, 263
Thiophene
highly ordered ultra-thin α5-thiophene films on SiO_2 and $Si(100)+O(N_2O)$, 87
Thiophene oligomers
photoluminescence under selective excitation of thiophene oligomers: relationship to microcrystalline structure, 223
Transport properties
inter-layer mixing effect on the transport properties of a dual-layer organic photoreceptor interface, 201
Trap-free polymers
space charge limited injection into trap-free polymers, 187
Tunneling
carrier injection into semiconducting polymers: Fowler–Nordheim field-emission tunneling, 23

Waveguides
poly(3-decylthiophene) as $\chi^{(3)}$ active material in waveguides, 293
